## 3. Risk Management Function

### Strategies and Processes

Credit risk process is a joint effort between business and credit areas. Relationship Managers involved in business interact with Credit Risk Officers in analyzing inherent risks in the customer's business, cash flow and structure a facility that simultaneously accommodates the Financing needs, while assuring seniority, protection and control of bank's assets and primary & secondary collateral.

### The structure and organization of the relevant risk Management function

The Board of Directors (BOD) is the ultimate authority in decision making process. The process, however, is initiated at the business unit, credit risk department and goes through the CEO, and the BOD. The risk management stops at different levels depending on the Bank's policy relating to approval discretions. Further policy manuals on credit, asset liability, information technology & operations are also available to guide the staff on day to day business.

### The scope and Nature of risk reporting and / or Measurement systems

Risk reporting/ measurement system is done through regular customer interactions, site inspections & annual reviews. This is a continuous process. Further, quarterly review of the bank's performance is conducted every quarter and Findings reported to the BOD.

### Policies for hedging and / or mitigating risk and strategies, and processes for monitoring the continuing effectiveness of hedges / mitigants

Policies for mitigating risks & strategies are as outlined in the respective manuals and as discussed at various levels after customer interactions/ visits, during annual reviews, quarterly reviews and at meetings at various levels.

### Types of eligible credit risk mitigant used and the benefits availed under CRM:

Particulars	Eligible CRM
